*Reckless!* Monitor Albert Einstein thought and wrote extensively not just on the most difficult problems in physics, but also in politics.

For the first time, this book collects his essays, interviews, and letters on the Middle East, Zionism, and Arab-Jewish relations. Many of these have never been published in English, and all of them contradict the popular image of Einstein as pro-Zionist. He was offered and refused the Presidency of

---

Israel, but had he taken it, he may have said things the Zionists didn't want to hear; he favored a non-religious state that would welcome Jew and Palestinian alike. One person's letters, even Einstein's, cannot resolve the crisis in the Middle East, but decades later, when horrors of the conflict in the Middle East are

familiar to everyone, the reflections of one of the twentieth century's greatest thinkers are a signpost, showing his commitment to social justice, understanding, and friendship between Jew and Arab.

Title 30 Mineral Resources Parts 200 to 699 (Revised as of July 1, 2013) Oxford University Press

From Robert Charles Wilson, the Hugo Award-winning author of Spin,

comes Julian Comstock, an exuberant adventure in a post-climate-change America. In the reign of President Deklan Comstock, a reborn United States is struggling back to prosperity. Over a century after the Efflorescence of Oil, after the Fall of the Cities, after the False Tribulation, after the days of the Pious Presidents, the sixty stars and thirteen stripes wave from the plains of Athabaska to the national capital in New York. In Colorado Springs, the Dominion sees to the nation's spiritual needs. In Labrador, the Army wages

---

war on the Dutch. America, unified, is rising once again. Then out of Labrador come tales of the war hero "Captain Commongold." The masses follow his adventures in the popular press. The Army adores him. The President is...troubled. Especially when the dashing Captain turns out to be his nephew Julian, son of the President's late brother Bryce—a popular general who challenged the President's power, and paid the ultimate price. As Julian ascends to the pinnacle of power, his admiration for the works of the Secular

Ancients sets him at fatal odds with the Dominion. Treachery and intrigue will dog him as he closes in on the accomplishment of his lifelong ambition: to make a film about the life of Charles Darwin. Bill Evans and Marianna Jameson first teamed up to write Category 7, vividly portraying the devastating impact of a powerful

hurricane on New York City. Now Evans and Jameson return with Frozen Fire, another edge-of-the-seat thriller that mixes atmospheric science with cutting-edge technology. Eager to exploit a potentially lucrative energy source, billionaire Dennis Cavendish has begun to tap the crystalline methane under the floor of the Atlantic Ocean. Eco-terrorism kills his science team and releases gigatons of poisonous

---

methane into the water and planet. At the Publisher's atmosphere, causing untold deaths. If the release isn't stopped, all life on Earth will soon disappear. Suspected of the sabotage and marooned far from home, Cavendish's beautiful and brainy security chief, Victoria Clark, along with methane expert Dr. Sam Briscoe and the US government, must find a way to seal the break in the ocean floor and nullify the methane that is already poisoning the

As one of only eight senators to vote against bank deregulation, Byron Dorgan warned America that a free-market system left unchecked is like a driving a car at ninety miles per hour without brakes. With the recent financial collapse having proven him right, Dorgan

exposes this modern-day carnival of greed and calls out the corporate executives who reap millions and even billions as a "reward" for self-interest and mismanagement. More poignantly, he argues that public officials we elect to represent the best interests of the people have sold us out, as government has become a partner to Big Oil, Big Media, and Big Pharma. In his prairie-populist voice peppered with incisive wit,

---

Dorgan argues that we must rescue the economy from the influence of financial conglomerates and power brokers, and to hold our public officials accountable for regulating the economy.

Conan volume 7: Cimmeria marks a transitional period in young Conan's life, as he spurns civilization — with its turncoats and legal trappings — and returns to the beloved, brutal country of Cimmeria, where he was born and raised. The dangers found in the snowy mountain passes of his

barbaric homeland are a welcome change from the mind games and treachery Conan encountered in the cities of the East, but there are unfortunate lessons in treachery to be learned here, too. When a tentative truce with the Aesir is threatened by the actions of Caollan, the first woman Conan ever loved, Conan again finds himself at the heart of a larger conflict that will test not only his physical strength and cunning mind — but his passionate heart as well. \* "(Truman) goes back to the same historical and mythical source material Howard must have used and mines it to expand on what Howard

already did. Now that's the way to put your stamp on a Howard tale. As a result, this reeks of Robert E. Howard influence. There is blood and there is fire... there is death and despair and indomitable will. Basically, everything you could want from a Conan story." —ComicsBulletin.com \* The hardcover version is a direct market exclusive of the trade-paperback collection, printed to initial orders only!

In this IBM® Redbooks® publication, we give an overview of different data management topics related to a typical SAP® data center. The intrinsic

---

functionality of SAP is not designed to completely handle all the tasks of a data center by itself, but the SAP system offers several interface possibilities to attach external tools to it to accomplish this task. We explain SAP basic concepts and the issues with SAP data management. We introduce Tivoli® Storage Manager and all of its products that are related to SAP data management. We provide some

comparison between database backup and recovery tools. Finally, we discuss data archiving using IBM DB2® CommonStore for SAP, and discuss high availability requirements and disaster recovery considerations. The second part of this book discusses a practical implementation of SAP backup and recovery with Tivoli Storage Manager. We implement this setup on two separate SAP systems: one running DB2

and the other running Oracle® database. We also implement LAN-free backup and FlashCopy® scenarios. In the sample implementation section, we show many different tasks, such as backup and restore, database recovery, backup monitoring, and tuning. We also cover some advanced backup/availability considerations, such as split mirror backup and standby databases. This book helps individuals that

---

operate an SAP environment to devise a strategy for a sound and comprehensive data backup solution using the IBM Tivoli Storage Management product family.

What lies beneath the millions of orbiting nanotech satellites that shroud the world called Haze? Major Keir Roget's mission is to make planetfall in secret, find out, and report back to his

For all his effectiveness as a security agent, Roget is troubled by memories of an earlier mission. When he was assigned to covert duty in the Noram backcountry town of St. George, he not only discovered that the long-standing Saint culture was neither as backward nor as harmless as his superiors believed, but he

barely emerged with his life and sanity whole. Now, scouting Haze, he finds a culture seemingly familiar, yet frighteningly alien, with hints of a technology far superior to that of the Federation.
