Are you ready for the Ice Age? Travel back in time to the days of early man and identify a mysterious animal that our ancestors painted on a cave wall long before the dawn of

recorded history! The Time Machine series challenges young readers to use their imagination and decision-making skills to write their own story. Options in the text allow readers to choose any path they like within the plot. Readers must draw on background information about the period to make the right choices. This makes the series a great educational device for youngsters to learn about history and all the different cultures, events, and periods that shaped it.

The "Theology in Dialogue" Series explores the relationship between theology and different, secular academic disciplines which appear within the degree programs of colleges and universities. Each volume begins with a chapter and a reply, providing a thoughtful justification for the interaction of theology and the particular subject. This is followed by a theoretical analysis of this interaction, and a range of case studies illustrating the situation in the classroom.

"English Literature, Theology and the Curriculum" explores the nature and authority of religious writings and their influence on secular literature. What makes it distinctive is the manner in which it investigates the textual dynamic between the two disciplines by combining both theory and case study in a single collection of writings. It discusses interdisciplinary dialogue, offers case studies on literature and theology from Anglo-Saxon verse to the twentieth-century novel, and looks at curriculum considerations. The eminence and breadth of the contributors is outstanding. Praise for English Literature, Theology and the Curriculum: "[A] superbly rich collection...as valuable to those involved in literary studies as to

theologians. It breathes life and real engagement."

--Times Educational Supplement "Fascinating and scholarly collection...This is an excellent book. Though some of the chapters are better than others, none is a dud. Its contributors and editor are to be congratulated." --Journal of Beliefs and Values "These substantial essays deserve more extensive comment than a brief review permits...Liam Gearon's chapter prompted this reviewer to embark on a reading of [Brian] Moore's work - a rewarding undertaking for which his chapter proved an invaluable guide." --International Journal of Children's Spirituality "Perhaps what is most noteworthy about Liam Gearon's edited volume is that it combines theory with practical applications and concludes with reflections on the implications for teaching....ample food for thought for instructors designing courses in literature, theology, or interdisciplinary subjects." --Teaching Theology *The Time Machine* ebooks

Based on the long-running Power Rangers franchise, five teens from Angel Grove High are granted superpowers and giant robot dinosaur Zords to defend Earth against the alien villain Rita Repulsa. When Repulsa creates an evil Green Power Ranger by brainwashing recent transfer student Tommy, the team is able to free

him from her grasp and get him on their side. But with remnants of Repulsa's control still stirring in the back of Tommy's mind, he must confront the fact he may be more of a danger to his new team than a help. This is "Green Ranger: Year One."

The Secret Society (Poptropica Book 3)  
Popular Press

Acclaimed as a work of genius when first published in 1895, *The Time Machine* represents a revolution in storytelling. H. G. Wells's first--and greatest--novel has been recognized worldwide as a founding text of the science fiction genre and one of the most seminal narratives of the last hundred years. This collection of essays offers a series of original, penetrating, and wide-ranging perspectives on Wells's masterpiece by an international group of major Wells and science fiction scholars. The authors explore such textual topics as the narrative techniques and mythological undertones of the novel as well as its contribution to modern ideas of time and evolution and its focusing of the intellectual cross-currents of the late nineteenth century. This insightful volume captures the innovative imagination, richness, and fascinating ambiguity that resulted in a classic literary work and demonstrates that Wells's novel is both a visionary story and an unstoppable idea.

He believes in science, but only magic can help his mom. Twelve-year-old Finn is used to people in his family disappearing. His twin sister, Faith, drowned when they were three years old. A few months ago, his mom abandoned him and his dad with no explanation. Finn clings to the concrete facts in his physics books—and to his best friend, Gabi—to ward off his sadness. But then his grandmother tells him a secret: the women in their family are Travelers, able to move back and forth in time. Finn's mom is trapped somewhere in the timeline, and she's left Finn a portal to find her. But to succeed, he'll have to put his trust in something bigger than logic.

"This is an incredible book, no matter which time universe you're in. I couldn't put it down. One of my favorite debut novels of the year."—Erin Entrada Kelly, *New York Times* bestselling author and 2018 Newbery Medal winner

"Beautifully written, eloquently reasoned...Mr. Buonomano takes us off and running on an edifying scientific journey."  
—Carol Tavis, *Wall Street Journal*  
*In Your Brain Is a Time Machine*, leading neuroscientist Dean Buonomano embarks on an "immensely engaging" exploration of how time works inside the brain (Barbara Kiser, *Nature*). The human brain, he argues, is a complex system that not only tells time, but creates it; it constructs our sense of chronological movement and enables "mental time travel"—simulations of future and past events. These functions are essential not only to our daily lives but to the evolution of the human race: without the ability to anticipate the future, mankind would never have crafted tools or invented agriculture. This virtuosic work of popular science will lead you to a revelation as strange as it is true: your brain is, at its core, a time machine.

A new short novel from Nebula Award nominee John E Stith, from *Amazing Stories*, with illustrations by Nikolett Timar. All life on Earth will die of thirst unless a couple of loners on the run can use a strange time machine to stop a secret project. Meg is an angry scientist's daughter. Her father is not a mad scientist, just really angry--so angry that he and Meg have rarely spoken since the death of her mother. Meg has become a loner, obsessed with combatting polluters like the ones who triggered her mother's death. And her father has had a different obsession. When Meg breaks into a paint company to expose their practices, she runs into Josh, another loner out to save the world. When Meg and Josh suddenly find themselves on the run from the cops, Meg heads for the one man who should always take her in--her father. But when Meg and Josh reach him, they find him dying. Just before he dies, he gives Meg a strange device that looks like a cellphone and tells her to use extreme caution. When the invention proves to be a time machine that holds the key to humanity's future, Meg and Josh must find a way to do the impossible--to work as a team. They are up

against the cops, a powerful billionaire, a Russian profiteer, and a romantic rival. Can they save the world, and save each other? "John E. Stith is one of our very best writers, and this is one of his very best stories: a big idea explored from every conceivable angle. *Tiny Time Machine* is a triumph." - Robert J. Sawyer, Hugo, Nebula, and John W. Campbell Memorial Award winner and author of *The Oppenheimer Alternative*. This volume features an introduction from Dr. Paul Levinson, author of the acclaimed *Phil D'Amato SF* mysteries. Following the story is Stith's "How I Built a Time Machine ... Story" afterword, which illuminates the evolution of idea into full novella. Also included is the long out of print short story, "Redshift Runaway," set in the same slow-light universe as Stith's Nebula Finalist novel, *Redshift Rendezvous*. About Stith's prior work: "Stith writes in the best hard-sf manner, dropping characters into a situation that can be solved only by thought and reason, but he also, more modernly, creates real and believable characters. He is becoming one of the most eloquent modern hard-sf practitioners." - Booklist
