We are rapidly heading towards a world in which the computing infrastructure will contain billions of devices, which will interact with other computing/communications devices that are carried or worn by users as they go through their daily routines. Such devices will provide data access to mobile users as they move within buildings, cities, or across the globe. This new infrastructure presents tremendous challenges for data management technology, including: huge scale; variable and intermittent connectivity; location and context-aware applications; bandwidth, power, and device size limitations; and multimedia data delivery across hybrid networks and systems. Traditional data management technologies such as query processing, transaction management, workflow, business process management, and metadata management must all be reevaluated in this emerging environment. Furthermore, nontraditional issues such as the semantics of mobile data, location-dependent querying, broadcast and multicast delivery, and caching/prefetching techniques must all be addressed. The ability to track people as they move about their daily tasks raises serious issues of security and privacy. This conference is the fourth in the Mobile Data Management series, focusing on the challenges and opportunities for the management of data in mobile, pervasive, and wearable computing. MDM 2000 and 2001 were in Hong Kong and MDM 2002 was in Singapore. Eighty-seven papers were submitted to the conference from 23 countries and were subject to a rigorous review procedure. Every paper had three or four independent reviews. Twenty-one full papers and 15 short papers from both academia and industry were selected for publication in this volume of proceedings.

Still 40, still sexy. This second volume of smart, seductive fiction proves that love has no maximum age limit. Featuring the works of Barbara Foster, N.L. Belardes, Greg Boose, Santana Smith, and more! The First Time by Donna George Storey: His cheeks were flushed now as he crawled the three steps to her, his tie dragging on the carpet. If only the bank president could see him now. A Rabbit Hole For Emily by Melinda Carroll: I no longer had to worry about how long it lasted as a prerequisite for sex. Or if it looked appropriate. Or age. I just needed to fall, let go and live. I was a forty-year-old woman! It was my time. 39-Lab by N.L. Belardes: There was money to be made and lives to be crushed in every view he took of this decadent view of L.A. Two Letters to Francine by Greg Boose: And while I am licking and humming and nibbling, you will shoot your arms out wide and pull dozens of oranges back over your body and onto my head. The fruit will thud against the ground while your orgasm bounces off the ceiling. I'll point to the cucumbers and you will tell me yes or no.

The Road to Redemption is a Perilous One! Frank Parker is still reeling from the Lenny Marquez Case and is working off his frustrations as a Katsaros enforcer. When Janet Foxx asks him to look into a so-called wrongful conviction, he finds himself trying to prove the innocence of one of Tycho City's most notorious killers. The case's broken path soon takes him to the infamous Pandrom Prison, where he'll come face-to-face with old demons that could change everything and turn him away from his crusade to find his partner's killer. But he can't languish for long. When his sequestered family finds itself in the crosshairs of a Lunatic hit squad, Frank must act to protect them and find a murderer before time runs out on his reluctant client. Can he find his family before the Lunatics? Will the truth be too much for Frank to bear? If he's not careful, he might find redemption for his notorious client and maybe a little for himself. Read all about it in this lightning-fast, cyberpunk noir.

In early modern England, religious sorrow was seen as a form of spiritual dialogue between the soul and God, expressing how divine grace operates at the level of human emotion. Through close readings of both Protestant and Catholic poetry, Kuchar explains how the discourses of 'devout melancholy' helped generate some of the most engaging religious verse of the period. From Robert Southwell to John Milton, from Aemilia Lanyer to John Donne, the language of 'holy mourning' informed how poets represented the

most intimate and enigmatic aspects of faith as lived experience. In turn, 'holy mourning' served as a way of registering some of the most pressing theological issues of the day. By tracing poetic representations of religious sorrow from Crashaw's devotional verse to Shakespeare's weeping kings, Kuchar expands our understanding of the interconnections between poetry, theology and emotion in post-Reformation England.

A defining collection from Alistair Cooke's legendary BBC Radio broadcasts, guiding us through nearly sixty years of changing life in the United States 'No one else succeeded in explaining to the English-speaking world ... the idiosyncrasies of a country at once so familiar, and yet so utterly foreign' Independent When Alistair Cooke retired in February 2004 he was acclaimed as one of the greatest broadcasters of all time. His Letter from America radio series, which began in 1946 and continued every week for fifty-eight years until his retirement, kept the world in touch with what was happening in America. Cooke's wry, humane and liberal style both informed and entertained his audience. The selection here, made largely by Cooke himself and supplemented by his literary executor, gives us the very best of these legendary broadcasts. It covers key moments from the assassination of Kennedy

through to the Vietnam War and Watergate to 9/11, the Iraq War and anticipates the 2004 elections. It includes portraits of the great and the good from Charlie Chaplin to Martin Luther King, Jr, and topics as varied as civil rights, golf, jazz and the changing colours of a New England fall. Each Letter contributes to a captivating portrait of a nation - and of a man.

Lovelace provides an introduction to Ada 95, one of the most widely used programming languages in the world. Although the reader is assumed to have a basic understanding of programming, no prior exposure to Ada is assumed and all the basics of the language are covered. The book comprises eighteen chapters each of which is composed of short sections designed to cover a small number of key concept and to provide a test question to check the reader's understanding of the concepts covered. Each chapter then concludes with a small quiz to help ensure that the reader has grasped the principles covered in the chapter. One of Ada 95's new features, its object-oriented facilities, is covered in depth, and all of the essential features of Ada programming are covered thoroughly. In Ada 95 significant enhancements were also added to Ada's

ability to interface with other programming languages (such as C, Fortran, and Cobol) and these are covered in one chapter. As a result both students and professional programmers learning Ada for the first time will welcome this new text.
