Sam McCready serves Britain as Chief of Covert Operations for the Secret Intelligence Service. He's competent, dedicated, in his prime. Why then this push to get him out? The options are painful -- early retirement or an administrative backwater. But he has one other option: it's a wild card, confrontational, risky. Risky because McCready knows too much. He senses the move is more about destabilizing SIS than settling a score with him. Who wants him out, and why? And what happens if he refuses to go quietly?

The Construction of Testimony
Createspace Independent Pub

A true work of nonfiction. Graphic and brutally honest, "11 Felonies" is a story for a new generation. Paul Wait grew up in South Florida, a place where the sun always shines and drugs are plentiful. This book is a collection of short stories that weave a larger, harrowing tale. Follow the life of a young man who loses his way and ends up becoming a massive drug dealer. Paul confronts things such as bullies, addiction, and mental health issues. In the end, Paul learns a valuable street lesson which is, "The game

giveth, and the game taketh away."

"Having been born a freeman, and for more than thirty years enjoyed the blessings of liberty in a free State—and having at the end of that time been kidnapped and sold into Slavery, where I remained, until happily rescued in the month of January, 1853, after a bondage of twelve years—it has been suggested that an account of my life and fortunes would not be uninteresting to the public."

The Fame of a Dead Man's Deeds Arms & Armour

The unforgettable memoir of 70 years of contemporary and personal history from the great French filmmaker, journalist and intellectual Claude Lanzmann Born to a Jewish family in Paris, 1925, Lanzmann's first encounter with radicalism was as part of the Resistance during the Nazi occupation. He and his father were soldiers of the underground until the end of the war, smuggling arms and making raids on the German army. After the liberation of France, he studied philosophy at the Sorbonne, making money as a student in surprising ways (by dressing as a priest and collecting donations, and stealing

philosophy books from bookshops). It was in Paris however, that he met Jean-Paul Sartre and Simone de Beauvoir. It was a life-changing meeting. The young man began an affair with the older de Beauvoir that would last for seven years. He became the editor of Sartre's political-literary journal, *Les Temps Modernes*—a position which he holds to this day—and came to know the most important literary and philosophical figures of postwar France. And all this before he was 30 years old. Written in precise, rich prose of rare beauty, organized—like human recollection itself—in interconnected fragments that eschew conventional chronology, and describing in detail the making of his seminal film *Shoah*, *The Patagonian Hare* becomes a work of art, more significant,

more ambitious than mere memoir. In it, Lanzmann has created a love song to life balanced by the eye of a true auteur.

The Path of the Witch Walter Foster Publishing

This is one of the most significant military books of the twentieth century. By an outstanding soldier of independent mind, it pushed forward the evolution of land warfare and was directly responsible for German armoured supremacy in the early years of the Second World War. Published in 1937, the result of 15 years of careful study since his days on the German General Staff in the First World War, Guderian's book argued, quite clearly, how vital the proper use of tanks and supporting armoured vehicles would be in the conduct of a future war. When that war came, just

two years later, he proved it, leading his Panzers with distinction in the Polish, French and Russian campaigns. Panzer warfare had come of age, exactly as he had forecast. This first English translation of Heinz Guderian's classic book - used as a textbook by Panzer officers in the war - has an introduction and extensive background notes by the modern English historian Paul Harris.

In his newspaper column, *Human Matters*, Steven Kalas answers readers' questions and adds his musings about life, love, family,

ethics, sex, culture, art, philosophy, religion, celebration and suffering - from the most noble aspects of the human experience to its deepest, darkest secrets. He allows us to look through his unique and quirky lenses to see his view of the world. Reading Human Matters is like talking with a therapist, writer, philosopher, father, former priest, performing singer/songwriter, and an amateur stand-up comic. Kalas is all of those things. Infusing his writings on everything from sexuality to hockey violence, are the repeating themes of personal integrity, responsibility, loyalty, spiritual enlightenment, and just being the best you that you can be. Being human demands of us, that we act like human beings, and not lesser creatures. Or as Kalas wrote in a

recent column, 'I can't prove that being human matters. But I've decided to live as if it does'.

The tools of environmental economics guide policymakers as they weigh development against nature, present against future, and certain benefits against uncertain

consequences. From reluctant-but-necessary calculations of the value of life, to quandaries over profits at the environment's expense, the policies and research findings explained in this textbook are relevant to decisions made daily by individuals, firms, and governments. The fourth edition of *Environmental Economics and Natural Resource Management* pairs the user-friendly approaches of the previous editions with the latest developments in the field. A story-based narrative delivers clear, concise coverage of contemporary policy initiatives. To promote environmental and economic literacy, we have added even more visual aids, including color photographs and diagrams unmatched in other texts. Ancillaries include an Instructor's Guide

with answers to all of the practice problems and downloadable slides of figures and tables from the book. The economy is a subset of the environment, from which resources are obtained, workers and consumers receive sustenance, and life begins. Energy prices and environmental calamities constrain economic growth and the quality of life. The same can be said about overly restrictive environmental policies. It is with an appreciation for the weighty influence of this discipline, and the importance of conveying it to students, that this textbook is crafted.

In 1989, former Winnipeg Blue Bomber Brian Jack stood accused of murdering his

wife Christine. Leading the prosecution team, John D. Montgomery won a conviction against him, but after three trials, numerous appeals and two appearances before the Supreme Court of Canada, that court entered a judicial stay of proceedings. Brian Jack is a free man even though he was convicted of manslaughter at his third trial. Now retired, Montgomery reminds us that all the evidence pointed clearly to Brian Jack's guilt and takes some of Canada's senior jurists to task over what he believes was a colossal miscarriage of justice. "What happened to Christine Jack? One day, she vanished off the face of the earth. In this provocative account, prosecutor John Montgomery makes it plain what he thinks happened to Christine Jack. She was

murdered, although her body was never found. In a stunning condemnation of Canada's justice system, Mr. Montgomery points the finger at the judges who let Christine Jack down and he levels a direct challenge to the man he says is responsible for Christine Jack's disappearance. The book is a gripping and provocative true-crime yarn, told only the way an insider could tell it."
