It is estimated that literally billions of residents in urban and peri-urban areas of Africa, Asia, and Latin America are served by onsite sanitation systems (e.g. various types of latrines and septic tanks). Until recently, the management of faecal sludge from these onsite systems has been grossly neglected, partially as a result of them being considered temporary solutions until sewer-based systems could be implemented. However, the perception of onsite or decentralized sanitation technologies for urban areas is gradually changing, and is increasingly being considered as long-term, sustainable options in urban areas, especially in low- and middle-income countries that lack sewer infrastructures. This is the first book dedicated to faecal sludge management. It compiles the current state of knowledge of the rapidly evolving

field of faecal sludge management, and presents an integrated approach that includes technology, management, and planning based on Sandecs 20 years of experience in the field. *Faecal Sludge Management: Systems Approach for Implementation and Operation* addresses the organization of the entire faecal sludge management service chain, from the collection and transport of sludge, and the current state of knowledge of treatment options, to the final end use or disposal of treated sludge. The book also presents important factors to consider when evaluating and upscaling new treatment technology options. The book is designed for undergraduate and graduate students, and engineers and practitioners in the field who have some basic knowledge of environmental and/or wastewater engineering.

With warmth, lucidity and good humour, Pagnol, a boy from the city, recounts the glorious summer days he spent exploring the sun-baked Provençal countryside. He vividly captures the atmosphere of a childhood filled with the simple pleasures: a meal, a joke, an outing shared with his close-knit and loving family. These heart-warming stories remind us of how children can invest the smallest event or statement with incredible significance, how mysterious the workings of the adult world can seem to them and how painful the learning process can often prove. However, Pagnol's writing is filled with enormous optimism and delight. And his triumph in these classic memoirs is to have created that rare thing, a work suffused with joy. 'Pagnol's place in the history of French culture is secure. The Prousts and Sartres may be admired, but Pagnol is loved' Times Literary Supplement [Culture: urban future](#) New Directions Publishing A Student Grammar of French is a concise introduction to French grammar, designed specifically for English-speaking undergraduates. Keeping technical detail to a minimum, it explains the fundamentals of the grammar in accessible and simple terms, and helps students to put their learning into practice through a range of fun and

engaging exercises. All the essential topics are covered, with chapters on verbs, nouns, adjectives, pronouns, determiners, prepositions, adverbs, negation, numerals, sentences, and clauses. Every grammatical point is illustrated with a range of authentic examples drawn from magazines and newspapers, covering many areas of contemporary life such as fashion, health issues, relationships and sport. It is clearly organized into a user-friendly, numbered indexing system, allowing the learner to quickly and easily locate any grammatical topic. Functioning both as an indispensable reference guide and a comprehensive workbook, this grammar will become the perfect accompaniment to any first or second year undergraduate course.

This case study highlights a typical example of the kind of gap that exists between

centralized planning and implementation. Despite the existence of fairly sophisticated central planning machinery in Ireland and an active desire for reform on the part of the government (with an explicit policy on school location, buildings, curriculum, etc.), the school networks in the County still remain largely outdated and ill-adapted to modern circumstances. This situation results in costly under utilization of resources, a lack of equality of educational opportunity and supply, and inadequate pedagogical provision. The County is highlighted geographically and placed comparatively in the Irish context under the headings of demography, economic and social background, and educational system. Profiles of the school networks are given, and an analysis and a diagnosis are made of the first and second levels respectively. Internal

comparative analysis by catchment area is made separately for the two levels under enrollment, transport, teaching staff, curriculum, physical facilities, costs, and financing. Prognoses and proposals for future school networks are made, and an enrollment forecast to 1976 is made against a background of the economic and social development perspective and the demographic trends for the County. The methodology, parameters, and principles of school mapping are presented. (Photographs may reproduce poorly.)

Black Skin, White Masks MacMillan

Black Skin, White Masks is a classic, devastating account of the dehumanising effects of colonisation experienced by black subjects living in a white world. First published in English in 1967, this book provides an unsurpassed study of the psychology of racism using scientific analysis and poetic grace. Franz Fanon identifies a devastating pathology at the heart of Western culture, a denial of difference, that persists to this day. A major influence on civil rights, anti-colonial, and black consciousness movements around the world, his writings speak to all who continue the struggle for political and cultural liberation. With an introduction by Paul Gilroy, author of *There Ain't No Black in the Union Jack*.

This new edited volume expands our

understanding of the processes by which

individuals and groups disengage from

terrorism. While there has been a growing

awareness of the need to understand and

prevent processes of radicalization into

terrorism, disengagement and deradicalization

from terrorism have long been neglected areas

in research on terrorism. This book uses

empirical data to explore how and why

individuals and groups disengage from

terrorism, and what can be done to facilitate

it. The work also presents a series of case

studies of disengagement programmes, from

Colombia, northern Europe, Italy, Yemen, Saudi

Arabia, Indonesia, Singapore and Malaysia,

comparing and assessing their various

strengths and weaknesses. In light of the

lessons learned from these cases, this book

describes and explains the potential for new

developments in counter-terrorism. This book

will be of great interest to all students of

terrorism studies, war and conflict studies,

international security and politics in

general, as well as professionals in the field

of counter-terrorism.
