No matter what anyone tells you, boat cooking IS different from cooking ashore. The space is smaller, there ' s no grocery store 5 minutes away, you have fewer prepared foods and electric appliances, and food storage is much different. Despite cruising different oceans, we—Jan and Carolyn--both faced the same challenges: eating well while having time to enjoy all the other great aspects of cruising. We love to snorkel, swim, kayak, explore—and just sit and admire the view. We learned with the cookbooks we both had aboard, and wished for information that wasn't available--like when Jan ended up with a frozen chicken complete with head and feet and no instructions on how to cut it up. When we couldn't get foods such as sour cream, English muffins, spaghetti sauce or yogurt, we adapted recipes to make our own. Other times, we experimented with substituting ingredients--maybe the result wasn ' t identical, but it was still tasty. We ended up with over 150 substitutions and dozens of “ make it yourself ” options. As we traded recipes and knowledge with each other, we realized we were compiling

information that became *The Boat Galley Cookbook*: 800+ recipes made from readily-obtainable ingredients with hand utensils, including numerous choices to suit every taste: not just one cake but 20, 16 ways to prepare fish, 10 regional barbecue sauces, and so on. Step-by-step directions to give even “non-cooks” the confidence they can turn out tasty meals without prepared foods. Detailed instructions on unfamiliar things like making yogurt and bread, grilling virtually every food imaginable, preparing and cooking freshly-caught fish and seafood, cutting up and boning meat, cooking in a Thermos and baking on the stove top, as well as lots of tips on how to do things more easily in a tiny, moving kitchen. All this in an easy-to-navigate format including side tabs on the Contents to help you find your way and extensive cross reference lists at the end of each chapter. Quick Reference Lists provide idea starters: suggestions of included recipes for such categories as Mexican, Asian, and Potluck. *The Boat Galley Cookbook* is designed to help you every step of the way. We hope it becomes a trusted reference on your boat, and a source of many enjoyable meals. [The Official John Wayne Handy Book of Bushcraft](#) Independently Published

After two decades of evolution and transformation, London had become one of the most open and cosmopolitan cities in the world. The success of the 2012 Olympics set a high water-mark in the visible success of the city, while its influence and soft power increased in the global systems of trade, capital, culture, knowledge, and communications. *The Making of a World City: London 1991 - 2021* sets out in clear detail both the catalysts that have enabled London to succeed and also the qualities and underlying values that are at play: London's openness and self-confidence, its inventiveness, influence, and its entrepreneurial zeal. London's organic, unplanned, incremental character, without a ruling design code or guiding master plan, proves to be more flexible than any planned city can be. Cities are high on national and regional agendas as we all try to understand the impact of global urbanisation and the re-urbanisation of the developed world. If we can explain London's successes and her remaining challenges, we can unlock a better understanding of how cities succeed.

From an insider's position, Sir Paul Newall tells the story of Japan's links with the City of London and explains why the City was first chosen by Japan as the focal point for its overseas financial investment. This account draws upon the author's close contact with Japanese governmental and financial authorities both in the UK and Japan itself. It documents the evolution and development of this relationship, from the earliest beginnings of Japanese financial contact in the 1860s. Important to economic and financial historians, this account should also be of particular value to those dealing with Japanese companies and financial institutions, as well as to those Japanese who are working, or have worked in the City. First published in 1996, this title is part of the Bloomsbury Academic Collections series.
