Upstream Lantern Books

This book is intended as an introduction to the archaeology of the easternmost regions of Greek settlement in the Hellenistic period, from the conquests of Alexander the Great in the late fourth century BC, through to the last Greek-named kings of north-western India somewhere around the late first century BC, or even early first century AD. The 'Far East' of the Hellenistic world - a region comprising areas of what is now Afghanistan, Pakistan, Iran and the former-Soviet Central Asian Republics - is best known from the archaeological remains of sites such as Ai Khanoum, which attest the endurance of Greek cultural and political presence in the region in the three centuries following the conquests of Alexander the Great. The 'Hellenistic Far East' has become the standard catch-all term for a network of autonomous and semiautonomous Greek-ruled states in the region east of the Iranian Plateau, which remained in only intermittent political contact with the rest of the Hellenistic world to the west - although cultural and commercial contacts could at times be very direct. These states, their rulers and populations, feature only occasionally in Greek and Latin historical sources. The two great challenges of HFE studies lie in integrating scholarship on this region into work on the Hellenistic world as a whole in a more than superficial way; and in understanding the complex cultural and ethnic relationships between the dominant Greek elites of the region and their neighbours, both within the Greek kingdom of Bactria and in its Central Asian hinterland.

Gateway B2 Student Book MacMillan

The series will provide much-needed descriptions of modern English which take the revelations of recent research into account. This book provides a comprehensive treatment of idioms and idiomaticity from a functional perspective. It examines the use of idioms in discourse to combine the novel and the conventional, to convey representations of the world, evaluate people and situations, signal conviviality or conflict, and create coherent, cohesive texts. The book goes on to consider implications for language learning and development.

Medical ELI

This series is specially designed for students from absolute beginner to pre-intermediate level. Each book consists of five modules and provides systematic preparation in all four language skills - listening, speaking, reading and writing - required at these levels. On Screen B1+ BAR International Series

For Stirling engines to enjoy widespread application and acceptance, not only must the fundamental operation of such engines be widely understood, but the requisite analytic tools for the stimulation, design, evaluation and optimization of Stirling engine hardware must be readily available. The purpose of this design manual is to provide an introduction to Stirling cycle heat engines, to organize and identify the available Stirling engine literature, and to identify, organize, evaluate and, in so far as possible, compare non-proprietary Stirling engine design methodologies. This report was originally prepared for the National Aeronautics and Space Administration and the U. S. Department of Energy.

Stirling Engine Design Manual ELI

Information-rich topics and texts immerse adult learners in themes and issues from around the world so that English is more relevant.

Upstream CAREER PATHS

The book deals with the application of fungi and the strategic management of some plant pathogens. It covers fungal bioactive metabolites, with emphasis on those secondary metabolites that are produced by various endophytes, their pharmaceutical and agricultural uses, regulation of the metabolites, mycotoxins, nutritional value of mushrooms, prospecting of thermophilic and wood-rotting fungi, and fungi as myconano factories. Strategies for the management of some plant pathogenic fungi of rice and soybean have also been dealt with. Updated information for all these aspects has been presented and discussed in different chapters.

Gateway B1 Student Book Humana Press

Gateway B1

Global Perspective for Competitive Enterprise, Economy and Ecology addresses the general theme of the Concurrent Engineering (CE) 2009 Conference - the need for global advancements in the areas of competitive enterprise, economy and ecology. The proceedings contain 84 papers, which vary from the theoretical and conceptual to the practical and industrial. The content of this volume reflects the genuine variety of issues related to current CE methods and phenomena.

Global Perspective for Competitive Enterprise, Economy and Ecology will therefore enable researchers, industry practitioners, postgraduate students and advanced undergraduates to build their own view of the inherent problems and methods in CE.

Teacher's book

With a new component array and strong digital support, the new edition of Close up has been fully updated to be in line with the new First for Schools 2015 specifications. Close up is still as interesting, topical and up to date as ever with spectacular National Geographic photography and facts that have been carefully selected to appeal to the inquisitive minds of young teenagers.
