Simulations in the Political Science Classroom Princeton Review

In his Nautilus Award-winning classic *Touching Spirit Bear*, author Ben Mikaelson delivers a powerful coming-of-age story of a boy who must overcome the effects that violence has had on his life. After severely injuring Peter Driscall in an empty parking lot, mischief-maker Cole Matthews is in major trouble. But instead of jail time, Cole is given another option: attend Circle Justice, an alternative

program that sends juvenile offenders to a remote Alaskan Island to focus on changing their ways. Desperate to avoid prison, Cole fakes humility and agrees to go. While there, Cole is mauled by a mysterious white bear and left for dead. Thoughts of his abusive parents, helpless Peter, and his own anger cause him to examine his actions and seek redemption—from the spirit bear that attacked him, from his victims, and, most importantly, from himself. Ben Mikaelson paints a vivid picture of a juvenile offender, examining the roots of his anger without absolving him of responsibility for his actions, and questioning a society in which angry people make victims of their peers and communities. *Touching Spirit Bear* is a poignant testimonial to the power of a pain that can destroy, or lead to healing. A strong choice for independent reading, sharing in the classroom, homeschooling, and book groups.

Mock Trials Princeton Review

A mock trial may officially begin with opening statements, but experienced competitors know that the dialogue between counsel and the court beforehand can make or break their chances of prevailing. In this new edition of *Mock Trials* the authors have added an entire new chapter (Pretrial Matters) to explain the questions students should ask before a mock trial begins and why the answers to those questions are important. Just as in an actual trial, pre-trial matters do matter in mock trials because they can affect nearly every aspect of case preparation and presentation. First published in 2000, *Mock Trials* has become the leading textbook used by students and coaches to prepare for mock trial competitions. The Second Edition improves upon the first by providing students and coaches at every level with a complete step-by-step guide to preparing, presenting, and winning a mock trial. Diagrams, charts and summaries, as well as sample fact scenarios, colloquies, and arguments, are used to explain complicated concepts simply in an easy-to-follow and interesting manner. This textbook is specifically designed for use by pre-law and law students, but the legal and stylistic techniques it teaches remain applicable throughout lawyers' careers. For high school and undergraduate students competing in mock trials or considering a career in law, *Mock Trials* gives a solid overview of the conduct of a trial from start to finish. It's also perfect for mock trial coaches to use as a how-to guide.

Research on students' media use outside of education is just slowly taking off. Influences of information and communication technologies (ICT) on human information processing are widely assumed and particularly effects of dis- and misinformation are a current threat to democracies. Today, higher education competes with a very diverse (online) media landscape and domain-specific content from sources of varying quality, ranging from high-quality videographed lectures by top-level university lecturers, popular-scientific video talks, collaborative wikis, anonymous forum comments or blog posts to YouTube remixes of discipline factoids and unverified twitter feeds. Self-organizing learners need more knowledge, skills, and awareness on how to critically evaluate quality and select trustworthy sources, how to process information, and what cognitive, affective, attitudinal, behavioral, and neurological effects it can have on them in the long term. The PLATO program takes on the ambitious goal of uniting strands of research from various disciplines to address these questions through fundamental analyses of human information processing when learning with the Internet. This innovative interdisciplinary approach includes elements of ICT innovations and risks, learning analytics and large-scale computational modelling aimed to provide us with a better understanding of how to effectively and autonomously acquire reliable knowledge in the Information Age, how to design ICTs, and shape social and human-machine interactions for successful learning. This volume will be of interest to researchers in the fields of educational sciences, educational measurement and applied branches of the involved disciplines, including linguistics, mathematics, media studies, sociology of

knowledge, philosophy of mind, business, ethics, and educational technology.

Drawn from interviews with students and attorneys from leading law schools and firms, *Finding Your Voice in Law School* delivers winning strategies for succeeding in law school and beyond. Author Molly Shadel, a former Justice Department attorney and Columbia law graduate who now teaches advocacy at the University of Virginia School of Law, also explains how to lay a strong foundation for your professional reputation. Communicating effectively—with professors, at social gatherings, with supervisors and colleagues at summer jobs, and as a leader of a student organization—can have a lasting impact on your legal career. Building the skills (and attitude) you need to shine among a sea of qualified students has never been more important. *Finding Your Voice in Law School* shows what it takes to become the lawyer you want to be.

3 things to know about the focus of Dynamic Business Law, 3e:

-Emphasis on ETHICAL DECISION-MAKING. In chapter 2, the authors introduce a framework for making ethical business decisions that students can use on a regular basis. Following each case there are questions designed to train students to apply this approach. Then repeatedly throughout the chapters, questions about business ethics are raised in the text. This framework is designed to help improve the learning process of students and to give a sense of relevancy to the ethical decision making process.

-Emphasis on CRITICAL THINKING. Neil Browne, one of the co-authors of this text, has written a successful text on critical thinking. His framework is included in Dynamic Business Law as well - to help students learn how to frame and reframe a question/issue. Critical thinking questions are also included at the end of each case, to further tie in this component. -Emphasis on the BUSINESS in business law. Dynamic Business Law emphasizes the tie of legal issues back to the core business curriculum. This will help both students and faculty. Students need to understand how the concepts they learn in this course tie into their business careers. Instructors can easily show that the study of business law is best seen as a foundational component of the larger study of business administration.
