This huge exploration of faith, tolerance, hatred, extermination, love, loyalty, self-sacrifice and hope in despair, is the first panel of a central diptych on the Reformation, and the heart of the wider tetralogy of Meyerbeer's grand operas, where issues of power, religion and love are examined in a variety of modes. For five years after the sensational première of *Robert le Diable*, Meyerbeer was thought to be resting on his laurels. Instead, he was drudging over a gigantic drama, partly adapted by Scribe from Mérimée's *Chronique de Charles IX*. It was hardly believed possible that the earlier success could be repeated. Most of the vivid details gleaned from every available document related to the time, were the composer's contribution to *Les Huguenots*. The music for this sombre tapestry of the Saint Bartholomew Massacre springs from the core of the vivid action and creates a panoramic alternation of moods, that capture the tragedy of religious intolerance and personal anguish in one of the most fraught events in history when some 30,000 French Protestants were murdered during the night of 24 August 1574. Meyerbeer's music rises to occasion, and reaches sublime heights of music drama, especially in the fourth and fifth acts, with the Benediction of the Catholic Diggers—one of the most electrical scenes in all opera—the more powerful Love Duet, and the trio of martyrdom in the last moments of the opera. Spectacle was incorporated in the plot, in Meyerbeer's concern to conjure up the couleur locale of those heroic times. The evocation of Marguerite de Valois's court at Chenonceaux, the recreation of late Medieval Parisian life with its Gypsy revels and the religionists' riots in the Pré-aux-Clercs, the wedding fete in the Hotel de Nesle, all grow out of the central idea. Meyerbeer was also very successful in his characterizations of individuals: the dreamy idealist Raoul, the passionate and self-sacrificing Valentine, the fanatical and implacable St Bris, the rough stolid Marcel, the elegant and capricious queen, the somewhat flamboyant but always honorable Nevers. All come to life in this score. The opera became enormously popular, its various arias a touchstone of operatic lyricism, and by 1936 had been performed 1120 times in at the Paris Opéra alone. In spite of its overwhelming dramatic power and instrumental riches of the score, the most significant aspect of the work came to be regarded the supremacy of the vocal parts. Performances at the Metropolitan Opera in New York during the 1890s were among the most famous in operatic history. Here performances attained a legendary status, the so-called *nuits des sept étoiles* ("the Nights of the Seven Stars"), as in 1894 with Nellie Melba, Lillian Nordica, Sofia Scalchi, Jean de Reszke, Edouard de Reszke, Pol Plançon, and Victor Maurel. Once again George Sand summed up with incomparable insight the essence of Meyerbeer's musico-dramatic achievement. "From stone floors that no Protestant knee ever warms, solemn voices seemed to resound, the tones of a calm, secure triumph and the expiring sighs and murmurings of a tranquil end, resigned, confident, without death-rattle or lamentation. It was the voice of Calvinist martyrdom, a martyrdom without ecstasy or delirium, a torment where suffering is stifled by austere pride and august certainty... These imaginary hymns naturally assumed in my mind the form of that fine canticle in your opera, *The Huguenots*; and, while I dreamt I heard the

cries of Catholic indignation and a sharp volley of musketry outside, a tall figure passed before my eyes, one of the noblest dramatic figures, one of the loveliest personifications of the idea of faith that art has ever produced in our time: Meyerbeer's Marcel. And I saw that bronze statue standing clothed in buffalo hide, quickened by the divine fire the composer had brought down upon him. I saw him, Maestro, forgive me my presumption, just as he must have appeared to you when you sought him at the uncompromising and steadfast hour of noon under the glowing arches of some Protestant church, vast and luminous as this one. Though you are a musician, you are more a poet than any of us! In what secret recess of your soul, in what hidden treasury of your mind did you find those clear, pure features, that concept, simple as antiquity, true as history, lucid as conscience, strong as faith? ... " The facsimile edition of the manuscript of this famous work, for so long kept private and then thought lost after the Second World War, enables lovers of opera to examine for themselves the compositional procedure of its great and often misunderstood creator. One can see the extent to which curtailment of the original conception was needed on the eve of the premiere: in the ensembles of both act 1 and 3 Meyerbeer's complex developments had to be reduced. The ever present problem of censorship also meant that the original idea of depicting Catherine de' Medici on stage as the instigator of the massacre had to be radically altered and her role substituted by the Comte de Saint Bris. The famous *viola d'amore* accompaniment to Raoul's rhapsodic act 1 romance ("Plus blanche que la blanche hermine") was originally conceived for the cello. The extraordinary *Andante amoroso* for the central part of the love duet also indicates Meyerbeer's preparedness to act on a good idea: in this case Adolphe Nourrit's suggestion that the cantabile be expanded. To see the MS of such a famous opera is both a moving and stimulating experience.

Robinet Indiana University Press *Spectroscopic Data Relative to Diatomic Molecules* provides information pertinent to the electronic spectrum and spectroscopic properties of diatomic molecules. This book consists of a collection of tables that mainly deal with electronic spectra located in the infrared, the visible and the ultraviolet. Thermochemical data have been used in this book to make estimates of dissociation energies while results from electron diffraction experiments have been used to determine internuclear distances. This text provides information regarding potential energy curves, ionization potential, correlations with atomic states, electronic configuration, lifetimes, transition probabilities, astrophysical applications, and chemical physics. The students will receive their language assignment after the selection phase where they will receive a language starter kit that allows them to begin language training while waiting to return to Fort Bragg for Phase II. The 3rd Bn, 1st SWTG (A) is responsible for all language training at the USAJFKSWCS. The Special Operations Language Training (SOLT) is primarily a performance-oriented language course. Students are trained in one of ten core languages with enduring regional application and must show proficiency in speaking, listening and reading. A student receives language training throughout the Pipeline. In Phase IV, students attend an 8 or 14 week language blitz depending upon the language they are slotted in. The general purpose of the course is to provide each student with the ability to communicate in a foreign language. For successful completion of the course, the student must achieve at least a 1/1/1 or higher on the Defense Language Proficiency Test in two of the three graded areas; speaking, listening and reading. This fascicle is the thirteenth in the series of Level One publications of the excavations at Franchthi Cave and is the third and final installment of the report on the site's chipped stone industries. The objective of Catherine Perlès's study is to make sense of the chronology of the site in its economic, technological, and typological dimensions. All phases of the Neolithic are represented at Franchthi Cave. Rich with more than 3,000 reconstructed pieces, this study offers a representative and technical typology that is unequalled today. The first part of the analysis offers diagnostic elements to facilitate comparisons between the lithic sequence and surface dating and is more descriptive than interpretive. The second part is dedicated to a step-by-step analysis of the Franchthi material in a well-defined chrono-stratigraphical framework. The third and most interpretive portion of the study addresses itself more specifically to those who are interested in the socio-economic organizational problems of Neolithic societies.

Totally Integrated Automation is the concept by means of which SIMATIC controls machines, manufacturing systems and technical processes. Taking the example of the SIMATIC S7 programmable controller, this book provides a comprehensive introduction to the architecture and operation of a state-of-the-art automation system. It also gives an insight into configuration and parameter setting for the controller and the distributed I/O. Communication via network connections is explained, along with a description of the available scope for operator control and monitoring of a plant. The new engineering framework TIA Portal combines all the automation software tools in a single development environment. Inside the TIA Portal, SIMATIC STEP 7 Professional V11 is the comprehensive engineering package for SIMATIC controllers. As the central engineering tool, STEP 7 manages all the necessary tasks, supports programming in the IEC languages LAD, FBD, STL, S7-SCL and S7-GRAPH, and also contains S7-PLCSIM for offline tests. As well as updating the previously-depicted components, this edition also presents new SIMATIC S7-1200 hardware components for PROFIBUS and PROFINET. In addition to the STEP 7 V5.5 engineering software, now STEP 7 Professional V11 is also described, complete with its applications inside TIA Portal. The book is ideally suited to all those, who, despite little previous knowledge, wish to familiarize themselves with the topic of programmable logic controllers and the architecture and operation of automation systems.
