Drawing extensively on empirical studies from the US, UK, Australia, and New Zealand, John Braithwaite and Ian Ayres offer an well-argued addition to the comparative literature on government regulation. In an effort to transcend the ongoing debate between those who favour strong state regulation and those who call for deregulation, they argue that regulation does not have to proceed with an adversarial tone, nor does it have to be 'soft' or 'hard' to be effective.

From the author of *Day of Reckoning*, the acclaimed critique of Ronald Reagan's economic policy ("Every citizen should read it," said *The New York Times*): a persuasive, wide-ranging argument that economic growth provides far more than material benefits. In clear-cut prose, Benjamin M. Friedman examines the political and social histories of the large Western democracies—particularly of the United States since the Civil War—to demonstrate the fact that incomes on the rise lead to more open and democratic societies. He explains that growth, rather than simply a high standard of living, is key to effecting political and social liberalization in the third world, and shows that even the wealthiest of nations puts its democratic values at risk when income levels stand still. Merely being rich is no protection against a turn toward rigidity and intolerance when a country's citizens lose the sense that they are getting ahead. With concrete policy suggestions for pursuing growth at home and promoting worldwide economic expansion, this volume is a major contribution to the ongoing debate about the effects of economic growth and globalization.

Brian Medlin met the novelist Iris Murdoch at Oxford in 1961 when he joined New College as a Research Fellow, and they remained friends for the remainder of her life, though after he left Oxford they only met once again. This correspondence published here covers a period of more than twenty years. In his letters, Medlin regaled Murdoch with Australian jokes, travel stories and anecdotes, and answered her many questions about Australian flora and fauna, and the Australian vernacular. She in turn quizzed him about his radical politics, and they agreed to disagree about Marxism and the bourgeoisie. In 1992, she wrote a review of his radical environmental monograph *Human Nature, Human Survival* for an Australian newspaper, and the full text of that review (only one-quarter of which was published at the time) is also published in this book. Medlin, born in 1927, was already in his mid-thirties when

he arrived at New College. He had not had a typical academic career. He spent his early years in outback Australia as a store-keeper, kangaroo shooter, stockyard builder, horse-breaker and drover. He returned to Adelaide in the early 1950s and studied Philosophy. After graduation, a scholarship took him to Oxford. On his return to Australia, he was appointed to the chair of Philosophy at the new Flinders University (founded in 1966). Iris Murdoch's correspondence with Brian Medlin is the record of a deeply affectionate relationship between two highly intelligent, articulate and philosophically sophisticated beings.

A constellation of essays that reanimates the work of this pivotal twentieth-century American poet for a new century. This volume is the first to reconsider Roethke's work in terms of the expanded critical approaches to literature that have emerged since his death in 1963.

Editor William Barillas and over forty contributors, including highly respected literary scholars, critics, and writers such as Peter Balakian, Camille Paglia, Jay Parini, and David Wojahn, collectively make a case for Roethke's poetry as a complete, unified, and evolving body of work. The accessible essays employ a number of approaches, including formalism, ecocriticism, reader-response, and feminist critique to explicate the poetics, themes, and the biographical, historical, cultural, and literary contexts of Roethke's work.

A New Course in Reading Pali Tyndale Kids

This book is intended and serve as an introduction to the reading of Pali texts. For that purpose, it uses authentic readings especially compiled for the purpose drawn largely from Theravada canonical works, both prose and poetry. The reading are in Roman script, and carefully graded for difficulty, but they have also been selected so that each of them is a meaningful and complete reading in itself, so as to introduce some basic concepts and ways of thought of Theravada Buddhism. This book thus offers and opportunity to become acquainted with the ways in which the teachings of the Buddha are embodied in the language, a sense that it impossible to determine from English translations. The book contains 12 lessons. Each of them has three parts: (1) a set of basic readings and an accompanying glossary, (2) grammatical notes on the forms in the less, and (3) a set of further readings with its own glossary. The further readings introduce no new grammatical points, but reinforce ones already presented and give further practice in them. The work concludes, fittingly, with the Buddha's first sermon, The Dhammacakkapavattana Sutta. A cumulative glossary and index to the grammar is also provided. The text has been used successfully in its preliminary form at several universities, but it may also be used for self-study.
