This is a self-study publication with two CD ROMs for students preparing for the Academic Module of the International English Language Test System (IELTS) which is administered by the British Council, the University of Cambridge Local Examinations Syndicate (UCLES) and by IELTS Australia. The book covers the four sections of the IELTS

exam: listening, reading, writing and speaking.

Special features of the book are: the reading exercises, the detailed Keys for these exercises, the wide range of exercises to help you prepare for Writing Task 1, and the detailed Key for the Reading Tests. The third edition incorporates additional material to cover changes made to the Speaking module of the IELTS examination.

---

The publication may also be used as a course book, or as a supplement to a course book. Also includes changes to IELTS writing rubrics.

An examination of why paper continues to fill our offices and a proposal for better coordination of the paper and digital worlds. Over the past thirty years,

many people have proclaimed the imminent arrival of the paperless office. Yet even the World Wide Web, which allows almost any computer to read and display another computer's documents, has increased the amount of printing done. The use of e-mail in an organization causes an average 40 percent increase in paper consumption. In *The Myth of the Paperless Office*, Abigail Sellen and Richard Harper use the study of paper as a way to understand the work that people do and

the reasons they do it the way they do. Using the tools of ethnography and cognitive psychology, they look at paper use from the level of the individual up to that of organizational culture. Central to Sellen and Harper's investigation is the concept of "affordances"—the activities that an object allows, or affords. The physical properties of paper (its being thin, light, porous, opaque, and flexible) afford the human actions of grasping, carrying, folding, writing,

---

and so on. The concept of affordance allows them to compare the affordances of paper with those of existing digital devices. They can then ask what kinds of devices or systems would make new kinds of activities possible or better support current activities. The authors argue that paper will continue to play an important role in office life. Rather than pursue the ideal of the paperless office, we should work toward a future in which paper and electronic document tools work in

concert and organizational processes make optimal use of both.
